

# Unimass

Property Management

## Project Overview

Unimass Housing Ltd is a Bangladeshi real estate company. They sell various types of flats all around Dhaka city. Here users can find all of their completed and upcoming projects from the site. Users can also get a brochure for a flat in their suitable location.

From the Admin site, Admins manage all of the company's employees, clients, and projects all together. Admins can assign a client to an agent so that they can manage the client in all ways. And Admins can track all of the agent and client information.

From the agent site, agents get to know their dedicated clients. And they manage all schedules with clients and update the client information according to client meetings.

## Problems

- Had to manage all client information manually
- Hard to track agents' communication with clients
- Most of the time lost client communication documents
- Had to go physically to get flat information
- Lots of paper had to be handled, some time it goes lost.

## Solutions

- ✓ All clients' information came online.
- ✓ Easily track all agents' status with clients.
- ✓ No chance to lose client documents.
- ✓ From the web, users can easily apply for a property by filling some basic information.

## Key Points

- ✓ Find property in desired location.
- ✓ All client information in one place.
- ✓ Property in affordable price.
- ✓ Easy application for buying a property.
- ✓ Highly secured all client information.
