

FePay

A Fintech App

Project Overview

Fepay is such a Fintech App that it has 3 types of users. They are Customer, Merchant & Cashier.

Fepay app is a digital currency app for Denmark. Where a user can send TAC money to another user. If a user needs, they can request TAC money from another user. Anytime direct withdrawal in a selected bank account. Also, users can recharge TAC money directly in the Fepay app from their selected bank account.

A Merchant can do all the things like a regular customer does from their app. In addition, Merchant manages all of its cashier accounts through the app.

A cashier account always will be under a merchant account. They get TAC money from the customer directly to the merchant account. And make refund requests if any customer wants.
